

DonJoy Cross Strap

Ideal Application

The DonJoy Cross Strap is designed for the treatment of patellar tendonitis, Osgood-Schlatters Syndrome and Chondromalacia.

Features and Benefits

- One piece design means there is nothing to fall off or lose
- Simple to use which means better patient compliance
- Low profile which means increased comfort
- Only two sizes which is easier to inventory than five or six
- Designed to apply a comfortable but effective pressure on the patellar tendon to help alleviate pain
- Smooth Neoprene laminated with Nylon loop is very comfortable and stays in place
- No stitching or stiff material edges in the popliteal space adds to patient comfort
- Affordable whether buying one or a Sports Pack of 25
