

Humeral Stabilizing System (HSS)

Ideal Application

The Humeral Stabilizing System is a terrific option for immobilization of stable humeral fractures, stable supracondylar fractures, and biceps/triceps repairs.

Features and Benefits

- 3 point stabilization
- Lightweight
- 2 lb. weight for axial traction
- Easy to apply
- Full circumference shells and padding
- Low cost alternative to serial casting
- Breakdown capability converting to upper arm cuff only
