

Knee pain doesn't have to be  
par for the course.

Keep your patients going full swing with the new DonJoy® OA ADJUSTER. As a pain-reducing alternative to surgery or pharmaceuticals, the OA ADJUSTER will have your patients teeing up their active lifestyles. By helping to minimize degenerative joint space narrowing, it offloads the knee during physical activities such as kneeling, bending, walking – or even conquering 18 holes. Call 1.800.336.6569 or visit [www.donjoy.com](http://www.donjoy.com) for more information about our entire line of knee osteoarthritis braces.
